

I am writing to you with regards to the Low Power FM (LPFM) issue. I DO NOT believe that the LPFM stations should have priority over current FM translator service. National/Regional FM translator services are of great value to our community.

For example, in San Antonio we receive the nationally boardcast radio program offered by K-LOVE (91.3, 106.3, and 92.1). K-LOVE has provided me with tremendous information regarding local concerts, community events, publically available services, as well as quality music. Should K-LOVE be removed in favor of a LPFM program, thousands of San Antonio listeners will not be keep informed of many local events as well as regional and national events that are of interest to our local population. Many of us would be outraged by any FCC decision that would remove our preferred radio program. Additionally, I believe that the service provided by K-LOVE is in the public interest. K-LOVE provides all listeners with detailed information about local events, in a timely manner and with local contact information. K-LOVE's reporting to the public is fair, balanced, informative, and completely relevant to our local community.

Do not let "Localism" displace relevant nationally or regionally based radio shows. Thank you.
